### **On Active Service in War and Peace**

Politics and Ideology in the American Historical Profession

*Jesse Lemisch*

*Introduction by Thomas Schofield*

This is a revised text of Lemisch's bitter, well-documented attack on the American historical profession for its rabid anti-radicalism and its complicity in American imperialism. Originally presented in 1969, Lemisch's paper has become an underground classic and is now made generally available for the first time. The introduction raises similar questions about the politics of the Canadian historical profession and situates Lemisch's pamphlet in the turmoil of the sixties. Published ISBN: 0-919940-00-5

## Workers, Wages and Controls The Anti-Inflation Programme and Its Implications for Canadian Workers Leo Panitch

An examination of the wage and price control programme recently instituted by the Canadian government. Panitch demonstrates how the measures both weaken the industrial power of workers and lower working people's share in the national income. He explains how the programme is designed to control wages and not prices, how similar measures have been applied in other countries, and, finally, concludes that only strong collective action on the part of workers can defeat the controls. 32pp
